

USE

- Spray coverage of paint should be in light dustings and several coats to achieve best finish and no runs.

CLEANING

- Stencil should be only cleaned with a damp cloth that has been dampened with paint thinner, turpentine or mineral spirits. Care should be taken wiping the edges of the letters.
- **NEVER USE** any lacquer or solvent based cleaners.
- It is possible to use an oven spray such as PAM on your stencil if applied with a light coat. This will make paint removal easier, especially if stencil is to be used several times over at one time.
